Ahmad Mollaei

Product-minded software engineering

contact@ahmadmollaei.dev | ahmadmollaei.dev | github.com/lonlydwolf

Benid-Alghar, KW | +965 95544145

Computer Science graduate building software alongside a career in automotive diagnostics and logistics. Focused on useful tools and strong backend and systems foundations, with a long-term direction in applied AI and intelligent applications.

Current work

Faculty

Current work | Personal-use beta

Seven AI skills I use for coursework, with separate roles for course planning, teaching, assessment, research, and build review. Course records preserve plans, assignments, and results across sessions.

Grew out of GeminiSensei: shifted from a standalone tutoring app toward a learning workflow I actually use. Workflow checks and limitations are documented in the repository.

Selected learning projects

Completed and archived. Project titles link to case studies and technical retrospectives.

GeminiSensei

Feb 2026

Tauri / React / Python / FastAPI

AI tutoring desktop experiment built for the Google DeepMind Gemini Hackathon. Did most of the development, with a friend and AI helping with the UI. Connected the frontend and backend, worked through persistence and release packaging, and used the lessons to develop Faculty.

XOR Neural Network with Backpropagation

Apr 2020

Python / C++ / C#

Implemented forward propagation, backpropagation, and weight updates without ML frameworks. The three implementations now include seeded demos and focused regression checks; their parameters and training budgets differ.

dotfiles-maintainer

Jan 2026

Python / MCP / Semantic memory

Built a prototype for recording and retrieving configuration decisions. Learned to define tool contracts around recurring needs and compare the maintenance cost with a simpler workflow using dotfiles and Git history.

CodeT5+ Fine-Tuning for Code Generation

Mar 2024

LoRA / 4-bit adaptation / Hugging Face

Notebook experiment adapting CodeT5+ 220M for code generation. Published artifacts and documented methodology and reproducibility limitations; no demonstrated improvement over the base model.

Experience & foundations

Operational experience alongside independent software development

Work experience

Computer Diagnostic & Electric Specialist

Jan 2024 - Present

Nile Garage | Kuwait

- Diagnose vehicle electrical and performance issues using automotive diagnostic tools and fault codes.
- Use AI-assisted research to understand diagnostic information and guide troubleshooting alongside practical investigation.

CEO & Co-founder

Sep 2022 - Dec 2023

Yonko Global Forwarding Company | Kuwait

- Founded and operated a freight forwarding startup, coordinating documentation, client communication, and day-to-day logistics.
- Managed freight operations and compliance across sea, air, and land transport.

Logistics Officer

Nov 2021 - May 2022

Khalid Sultan / Natureland | Kuwait

- Managed GCC import operations for an organic food supply chain, including shipment reporting and landed cost analysis.
- Coordinated with shipping lines and air freight agents, negotiated rates, and identified opportunities to manage freight costs.

Purchase Executive / Customs Brokerage Liaison

Nov 2019 - Oct 2021

Afrah Al-Khaleej Co. | Kuwait

- Managed procurement and customs workflows for a building materials trading company.
- Coordinated supplier documentation, procurement reporting, and customs approval requirements.

Tools I've worked with

Languages: Python, TypeScript, C++, C#, Bash

Applications & tooling: FastAPI, React, Tauri, FastMCP, Git, GitHub Actions, Docker, Linux, Jujutsu

AI experiments: PyTorch, Hugging Face Transformers, LangGraph, LangChain, Gemini API, MCP

Education

Self-Directed Continuing Education

Relevant Coursework: Mathematics for ML & Data Science Specialization, ML & Deep Learning Specialization

University of Tabriz

Sep 2014 - Jun 2019

B.Sc. Computer Science | GPA: 14.67/20

Certificates

Data Science Math Skills

Apr 2024

Duke University

Languages

Arabic (Native), Persian (Native), English (Fluent)
